

Timelapse recording the construction of the project of Grace Farms SANAA

07:00 - 19 March 2016 by Eric Oh Translated by Romullo Baratto

Grace Farms, designed by SANAA, perfectly illustrates the sinuous and elegant style of Japanese office, combining the use of glass and structure to create spaces as fluids that are hard to believe when you see a photograph.

A timelapse video performed by [Work Zone Cam](#) shows the construction of this project, recording the period between September 2013 and October 2015. The Work Zone Cam worked with the Paratus Group - project manager - to document the work of the construction process including its central element: the River, a cover-shaped ribbon that perfectly blend with the landscape.
